

MINISTRY OF ICT AND NATIONAL GUIDANCE

LIST OF NIISP ICT INNOVATORS FOR FUNDING UNDER PHASE II

Application ID	Budget	Title	Additional Information	Amount
000001170LEVEL2	74,900,000	eLunda	E-Lunda is a mobile based platform created to support dairy farmers with timely information management to keep track of the productivity of their farms and animals.	74,900,000
000000962LEVEL2	270,000,000	TraVel Uganda Monitor (KOLE District)	Travel Uganda Monitor is a Mobile App and web based online monitoring solution using instant timeline notifications to link beneficiaries of Operation Wealth Creation to the suppliers (for supplies) traders (for Market), Cooperatives (for Advisory services, market, and financing), Agro processing industries (for value addition and market), Government (advisory and follow-ups) and financial institutions (for financing).	70,000,000
000000938LEVEL2	1,900,000,000	Jaguza Livestock	Our Jaguza app enables users to perform a range of livestock record management tasks via the convenience of their smartphone or tablet whilst on the go and also from our online web-based system and offline desktop system even from ordering ear tags, to recording animal movements and capturing and recording weight data.	100,000,000
000000078LEVEL2	1,376,000,000	Akellobanker	Akellobanker is a data-driven mobile (USSD, SSM) & web platform that enables farmers to access and order for improved seeds/inputs, tractor hire services/farm implements, farm extension services, and Medical services for cash or on credit.	100,000,000

Application ID	Budget	Title	Additional Information	Amount
000001230LEVEL2	263,000,000	Agro Value Chain Manager Mobile App	The name of the Application is Agro-VCM, an Agriculture Innovation Application built to facilitate the way different stakeholders interact and access information about the Agro-trade cycle.	70,000,000
000001102LEVEL2	315,000,000	Omulunzi Information Management System	Omulunzi Information Management System (OIMS) is a web-based & desktop, SMS and Interactive Voice Response (IVR) / USSD is a new innovation which is used to boost the livestock sector Eco-system to support information sharing amongst different stakeholders on value chain platform most especially livestock farmers.	70,000,000
000000628LEVEL2	303,500,000	LivestockFarm-lite	An Agricultural Innovation Application aimed at facilitating holistic livestock management for farmers, covering all the major processes and activities involved in day-to-day management of a livestock farm.	70,000,000
000000985LEVEL2	1,330,000,000	Patasente	Patasente.com is an e-merchant platform that facilitates trade between businesses in Africa. We enable them undertake e-procurement, settle payments and secure financing.	100,000,000

Application ID	Budget	Title	Additional Information	Amount
000001202LEVEL2	152,730,000	OWC i App	OWC-i App means the Operation Wealth Information App. The App will enable easy collection of Farmer information during the process/activity of selection of farmers for technology uptake and for monitoring and Evaluation of the progress of activities and utilization of the Funds by beneficiaries.	50,000,000
000000778LEVEL2	199,000,000	Constituency Farmers App	The innovation is basically on an Application that will join farmers in different constituency by enabling them get market for their crops Produced. The app should be able to return particular farmers with a specified quantity of crops / animals and should show those farmers who were certified by UNBS (these will be provided to Identify certified farmers).	60,000,000
000000774LEVEL2	432,000,000	Akatala App	Akatala App is a smart-phone application that provides a highly efficient and best price grocery delivery service to consumers while also connecting farmers and the vendors of agricultural produce to the final consumer.	70,000,000

Application ID	Budget	Title	Additional Information	Amount
000001176LEVEL2	672,000,000	Mobile App for UNEB Services	The mobile App for UNEB Services is a solution that can run on the popular mobile devices (tablet, mobile phone, and Unified Windows Platform) to consume UNEB services. This is a cross-platform mobile App with a single code-base that is compatible with multiple mobile operating systems (iOS, Android and Windows).	250,000,000
000001011LEVEL2	12,103,350,000	National Education Management System	The National Education Management Information System (EMIS) is a robust end-to-end system for Ministry of Education and Sports (MOES) to manage the administration of education services in Uganda.	300,000,000
000001050LEVEL2	139,600,000	Mwalimu An Intelligent Content Repository and Education Management System	Mwalimu (http://eureka.ug/nDesign/) is an Intelligent content repository and management system that leverages artificial intelligence and internet technologies to promote student centred learning (SCL) thereby removing geographical and financial barriers to access of quality education while simultaneously achieving 21st century learning skills.	50,000,000
000001117LEVEL2	15,000,000	Sign Language Dictionary and Translator	The Sign Language Dictionary and Translator is a program running on windows environment.	15,000,000
000001193LEVEL2	163,400,000	An App for Counseling University Students on Psycho Social Issues	The main objective of this project is to develop a mobile technology application that can support availability and quality of psycho-social counseling services for university students in Uganda and other developing countries.	70,000,000

Application ID	Budget	Title	Additional Information	Amount
000000604LEVEL2	532,000,000	KAINOafrica	The system is known as "KAINO" and our idea is an Academic Content Learning Management System which uses the KAINOtab as our main product channel, web and mobile apps to enable teachers in Uganda access curriculum aligned teacher guides in line with government education syllabuses	100,000,000
000000130LEVEL2	522,360,000	sTrack	The ministry of education can use this tool to efficiently monitor, track and plan for all the schools in the Country by providing access to other sectors like public services, UNEB and other players in the education sector. This will ensure that planning is always based on real-time statistical evidence.	70,000,000
000001220LEVEL2	369,000,000	School Education Management and Governance Platform	SchoolAfrica Ltd., has designed a homegrown Education Management and Governance Platform that is designed to work seamlessly in managing Nursery, Primary, Secondary education sectors.	70,000,000
000001209LEVEL2	338,000,000	School Management and Business Process Tracking Platform for Schools in Uganda	Smart platform automates business processes that are used in schools and colleges in both private and public sector. The processes and modules covered include admission, registration, attendance management, learning management, academics management, lesson plan management, human resource management, payroll management, finance, budget and accounting, financial aid, scholarships, and grants.	100,000,000

Application ID	Budget	Title	Additional Information	Amount

Besides the traditional classroom setup of teacher to pupil instruction, pupils are taught with the aid of audio-visual content including illustrations and videos to enable better understanding of classroom work.	100,000,000
000000850LEVEL2	1,079,732,000	Package for School Management	Our innovation is an education support solution comprising of 3 components in 1; an education management system – PSM [Package for School Management], a cloud powered application – myChild designed for parents to access their children's progressive information and a payments platform - myChild Payments that facilitates school fees payments through Interswitch	100,000,000
000001125LEVEL2	125,000,000	MamaOpe pneumonia diagnostic aid	MamaOpe is a wearable device that determines and interprets Respiratory Rate (RR) and lung sounds for the diagnosis of pneumonia. Lung sounds are detected using piezoelectric microphone probes placed over strategic lung fields.	70,000,000
000000047LEVEL2	200,000,000	A-Lite Vein Locator.	A-Lite Vein Locator is a low cost, non-invasive lightweight blood vessel illuminator designed to alleviate the Clinician's work burden associated with finding a proper vein during peripheral intravenous cannulation among children with barely visible or palpable veins.	70,000,000

Application ID	Budget	Title	Additional Information	Amount
000000394LEVEL2	180,680,000	A remote temperature monitoring for newborns	The Autothermo device is a wearable bracelet that continuously monitors neonatal temperatures for sick newborns admitted in neonatal care units.	100,000,000
000001167LEVEL2	175,530,000	MobiCare	MobiCare is a smart phone mobile based application that helps patients/caretakers contact health professionals for appointment scheduling and medical consultation.	100,000,000
000001014LEVEL2	38,380,000	Photokabada	Photo-kabada is a phototherapy machine that will be able to treat six babies simultaneously due to its modular design. It will be divided into six smaller discrete, well ventilated and interchangeable photo modules/photomods that are independent of each other	38,380,000
000001150LEVEL2	151,790,000	Making health care accessible for deaf patients	Digital Speech Assistant (DSA) is a software application that runs on smartphones/tablets or laptops. The software is a duo user at one instance where two devices are connected via Bluetooth.	100,000,000
000000651LEVEL2	276,952,200	SMART MEDTECH MANAGEMENT SYSTEM	Our technology is an automated Smart Medtech Management System (SMMS) with a hardware device (SMMS device) which can remotely monitor and report location, report functionality and usage of medical devices in real-time	100,000,000
000000825LEVEL2	75,000,000	Open Platform for Hospital Management Information System	A Comprehensive Hospital Management System, named Helecare2x with automatic Agile Software Development and Support Framework. Helecare2x is an enterprise grade Hospital Management System with automated support for modular upgrades, incremental development and continuously delivery.	75,000,000

Application ID	Budget	Title	Additional Information	Amount
000001129LEVEL2	165,800,000	COMPREHENSIVELY CUSTOMISED ACCOUNTING SOFTWARE For Clinics	SACCS is a software tool that was developed to reduce the time and cost required to manage patient records, appointments, health campaigns and financial transactions, thereby improving the quality of service given to patients and stake holders and also get more productivity from the medical staff.	80,000,000
000000748LEVEL2	700,000,000	Dagala App	Dagala is an on-demand healthcare access innovation in form of a web platform and downloadable APP on both the App store and Google Play store	100,000,000
000000154LEVEL2	24,000,000	Unified Medical Laboratories Sample Tracker	Sample Tracker is an automated Medical Samples Transportation Workflow Tracking system using both a Web and Mobile Application.	24,000,000
000000998LEVEL2	2,127,738,140	YONJA	YONJA' is a GIS enabled mobile application designed to provide and improve waste and sanitation service delivery in urban areas of Uganda, by connecting legally registered waste management entrepreneurs to customers.	100,000,000
000000785LEVEL2	40,000,000	BLIND ASSISTANT APPLICATION	BLIND ASSISTANT APP: this is an artificially intelligent simple but sophisticated mobile application that turns a smart phone into eyes that the blind and visually impaired people can use in reading written words and in doing their daily duties.	40,000,000

Application ID	Budget	Title	Additional Information	Amount
000000910LEVEL2	72,300,000	SignTap	The SignTap is a mobile application and Web-linked portal that enables one to be able to book and schedule a Ugandan Sign language Interpreter with ease. the App incorporates geotags and proximity based identifiers while that enable access to sign language interpreters for Deaf people and those wishing to hire one.	72,300,000
000000609LEVEL2	250,000,000	Young Engineers	The 'e2 Young Engineers' is an educational enrichment innovation that teaches children aged between 4 and 15 years, practical skills in Science, Technology, Engineering, Maths & Innovation (STEMI) using LEGO bricks and Robotics.	100,000,000
000001137LEVEL2	1,500,000,000	Introducing Illiphant the African film and music video on demand app	Introducing Illiphant, the proudly Ugandan Film and Music streaming app. This video on demand app will stream the best films from Ugandan and Pan African talent to the rest of the world.	100,000,000
000000723LEVEL2	398,200,000	Electronic Document Management System	The Info Consults international ltd team proposed innovation is to build, test and design a cloud-based Electronic Document Management System (EDMS) that provides the requisite modules to facilitate records/document creation, usage, storage, transfer and disposal throughout the active, semi active and inactive records lifecycle.	100,000,000

Application ID	Budget	Title	Additional Information	Amount
000000753LEVEL2	161,824,000	Education App	The education app aims to improve the performance of students through an Android mobile app in Universal Primary Education (UPE) and Universal Secondary Education (USE) facilities across the country by developing and delivering self-assessment questions initially from past papers of Uganda National Examinations Board (UNEB) and provide instant feedback and results for the learners using different techniques including machine learning and artificial intelligence to provide a rich user experience.	100,000,000
000000793LEVEL2	349,600,000	Multifactor Authentication System	The Multi-Factor Authentication System (MAS) helps safeguard access to data and applications while maintaining simplicity for users. It provides additional security by requiring a second form of authentication and delivers strong authentication via a range of easy to use authentication methods.	100,000,000
000001161LEVEL2	720,000,000	eRegistry	e-Registry. Our Innovation intends to enable citizens apply for licenses online from where they are and to make payment from anywhere on the globe using all allowable payment channels in Uganda.	200,000,000
000000432LEVEL2	498,285,500	getaplot mobile application	GetAplot is a location based smartphone mobile application designed to bridge the gap between those looking for events/plots and places/brands that provide them. Approved places post events, promotions and discounts.	100,000,000

Application ID	Budget	Title	Additional Information	Amount
000001154LEVEL2	63,000,000	A proposal to create a reliable marketing network in the agricultural sector for local farmers	Soul food is a data driven initiative that hopes to connect local farmers to the buyers and consumers of their agricultural produce. Our vision is to capture the essence of Ugandan farming by creating a data driven production scheme where farmers can make informed decisions on their agricultural practice and what to produce based on consumption data from the market.	63,000,000
000000846LEVEL2	670,400,000	Digital Postal Services Management System	EPosta is a Postal Office Management System that enables Post office offer all its services online. It is an end to end Post office management platform which enables all Ugandans to register and obtain both physical and Virtual postal addresses online.	100,000,000
000001130LEVEL2	960,000,000	ICT AS AN ENABLER OF BUSINESS PROCESS OUT SOURCING IN UGANDA	ICT AS AN ENABLER OF BUSINESS PROCESS OUT SOURCING IN UGANDA in an innovation being promoted by MIDAS BPO LTD to reduce unemployment levels of youth especially those qualified in ICT. Business Process Outsourcing (BPO) is a sub set of outsourcing that involves the contracting of the operations and responsibilities of specific business processes to a 3rd party services provider.	100,000,000
